## Tablet Sync & Charge Cart

Charge. Sync. Store. Secure. The cleverly designed TabSync tablet sync and charge cart is an essential component of any tablet learning classroom. TabSync gives you the freedom to charge any combination of up to 32 iPads and Android tablets for one-of-a-kind flexibility. Quickly add, remove or modify apps, files and user profiles simultaneously on all connected iPads using the sync function. Rest assured that your tablets are safe and sound thanks to TabSync's durable steel double doors and three-point lock. And enjoy handy storage compartments, ergonomic handles, a non-skid work surface and 3 additional AC power outlets for unparalleled convenience.

### Ready. Set. Charge!

Charge up to 32 iPads, iPad minis and/or Android tablets in no time with full 2.1A DC charging power provided to all connected devices. What's more, TabSync's USB charging cables are installed upon assembly at no extra charge, making tablet charging as simple as plug and go!

### Sync in seconds

Sync any iPad or Android tablet quickly by connecting your MacBook or laptop to TabSync via USB. Sync up to 32 iPads sequentially by running specially designed software from Apple, saving time otherwise wasted tediously managing iPad files, apps and user profiles individually.

### Secure your investment

Enjoy peace of mind knowing that your tablets are safely stored and secured behind TabSync's slot-in steel double doors and steel three-point locking mechanism. This theft-deterrent design makes prying open the metal doors an extraordinary task for any would-be thief or vandal.

### Real-time status check

Located conveniently on the top of the cart, the status indicator uses colored LED lights to let teachers and students know right away whether any one particular tablet is fully charged, still charging or if synchronization is in progress, all without ever having to open the doors.

### Functionality meets style

Form, fit and function are in perfect harmony with TabSync. The non-skid surface, 3 country-specific AC power outlets and multiple storage compartments turn TabSync into a mobile teaching station perfect for use with laptops, AVer visualizers, the AVer TabCam, wireless routers and more. Also, the ergonomic handles, highly maneuverable locking swivel casters (wheels) and wall-mounting hook allow for hassle-free cart transportation and storage.
